

## **JPAG symposium programme**

### **Thursday 6th February 2020**

In silico techniques

*Royal Society of Chemistry, London*

**Thursday 6th February**  
**RSC London**

As the pace of pharmaceutical development accelerates, and organisations look to reduce timelines in all parts of the discovery and development process, opportunities emerge for the greater use of in silico tools to reduce the demand for materials or experimental tests. This meeting will showcase a range of applications of in silico modelling, whether for prediction of properties via first principles modelling, or applying contemporary tools for data-driven modelling. Examples covering chromatography and the physical form of drugs will be discussed, as well as tools for prediction of the key performance properties such as toxicology, dissolution and stability.

#### Speakers:

Dr Edward Close - Process Systems Enterprise

Prof Mel Euerby - Shimadzu

Dr Andy Maloney - Cambridge Crystallographic Data Centre

Dr James Mann - AstraZeneca

Dr Ed Milton-Harris - ACD/Labs UK

Dr Ghazala Sadiq - Cambridge Crystallographic Data Centre

Dr Garry Scrivens - Pfizer

Dr Patrick Wray - Bristol-Myers Squibb

#### **Thursday 19th March 2020**

Annual General Meeting

*Royal Society of Chemistry, London*

This is a closed meeting for members of JPAG

It is not necessary to register for the symposium to attend the AGM

Starts at 9.30 am

#### **Thursday 19th March 2020**

Data integrity II

*Royal Society of Chemistry, London*

Data integrity still continues to be a very hot topic for Industry and regulators alike. Data integrity still appears in the list of top five audit findings. This is a must attend meeting for anyone involved in addressing issues and challenges associated with data integrity.

Speakers:

Martin Hall - Covance

Dean Harris - GW Pharmaceuticals

Jason Wakelin-Smith - MHRA

#### **Thursday 7th May 2020**

ICH Q3E (Extractables and Leachables): setting the scene

*Royal Society of Chemistry, London*

ICH Q3E (Extractables and Leachables) has been adopted by the ICH governing body as ICH Q3E and will now progress through the various ICH stages that will culminate as an international harmonised guideline. This meeting will be an important event in understanding and trying to influence the outcome of the ICH Q3E proceedings.
