

JPAG symposium programme

Thursday 13th May 2021

Biological potency

VIRTUAL EVENT : 1pm-4pm (UK GMT)

Biological activity is a critical quality attribute for biological products. As this class of therapeutics expands and becomes more complex, with the growth of antibody-drug conjugates and cell and gene therapies for example, there are increasing challenges in developing scientifically relevant biological potency assays suitable for each stage of the product life cycle and, in particular, assays that are sufficiently robust for use in the GMP QC environment supporting clinical and commercial manufacturing.

This meeting will consider approaches to overcoming those challenges, including strategies for transitioning assays from R&D into the QC environment, application of new technologies to improve robustness of assays and methods for measuring the potency of cell therapies.

Thursday 1st July 2021

Aseptic manufacturing

Virtual meeting

Steriles manufacturing remains one of the most challenging areas of the pharmaceutical industry from both a compliance and a technical perspective. The regulatory expectations continue to evolve, however slowly and new technology has the potential to massively change ways of working.

This meeting is a must for all those in senior roles, QPs and anyone who has an eye on the future in the sector.

Wednesday 17th November 2021

The pharmaceutical analysis research awards and careers symposium 2021

Royal Society of Chemistry, London

JPAG presents the pharmaceutical analysis symposium for postgraduate students and early career stage scientists, including those in industry. This will provide the opportunity for delegates to showcase their work and network with peers, academics and industrial scientists through oral and poster presentations. There will be a £1,000 first prize and £250 second prize for the best oral presentations as well as £200 first prize and two runner-up prizes of £100 for the best posters. **Registration is free for all students, early career stage scientists and their supervisors/managers**, but we highly encourage students and early career stage scientists delegates to submit an abstract for poster or oral presentation to this exciting annual JPAG event.

The deadline for submission of abstracts is Tuesday 31st August 2021

In addition, there will be a Networking and Careers Fair with the opportunity to meet with big industry pharma and other key contacts and take advantage of the great networking opportunities. This could be the event to provide a step-change to your professional career. Perhaps your future employer will be here.

The event will finish with a free wine reception.

This could be the event to provide a step-change to your professional career. Perhaps your future employer will be here.

Registration will open at 8:30am for a 9am start, and the day will end with a Careers and Networking wine reception and further networking opportunities starting at 6pm.

NOTE: If the current Covid-19 situation continues and government guidance is to not allow in-person events, then we will run this as a virtual event instead, and the details shown on this website will be updated to reflect this.

Register now at www.jpag.org/cp151
